CHILLY'S ORIGINAL

24 ORE FREDDO
12 ORE CALDO

DESIGN

• Stile & Performance

Tutti i nostri prodotti sono costruiti con la tecnologia avanzata del vuoto a doppia parete, offrendo alte prestazioni con design moderni ed eleganti.

Sia che voi siate al lavoro, sia in palestra o in spiaggia, volete sempre la vostra Chilly's con voi.

• Usa Meno. Bevi di Più

Sappiamo che essere eco-friendly è importante per te, ma non è sempre facile cambiare le vecchie abitudini.

Grazie alle prestazioni superiori ed allo stile dei nostri prodotti non vorrai mai trovarti senza di loro, il che vuol dire che ridurrai significativamente o bloccherai la tua dipendenza dalla plastica monouso. Lo promettiamo, non guarderai mai più indietro!

SALUTE

• Resta Idratato. Resta in Salute

E' semplice, quando la tua acqua è sempre fresca, berrai di più. Con Chilly's, rimanere idratati non è mai stato così facile o divertente.

• Verniciatura a polvere

Per perseguire il nostro obiettivo di creare i prodotti di altissima qualità, tutte le Chilly's Bottiglie con colore singolo sono ora finite usando un processo avanzato di verniciatura a polvere. Questo offre una finitura molto più resistente, con lo stesso colore sorprendente che ti aspetteresti dalle Chilly's Bottles.

FREDDO

• 24 Ore Freddo

Bevande ghiacciate fino a 24 ore, indipendentemente dalla temperatura esterna. Il nostro isolamento avanzato con vuoto a doppia parete fa dell'acqua calda una cosa del passato.

• 12 Ore Caldo

Mantiene il tuo tè o il caffè caldo fino a 12 ore. Perfetto per quelle passeggiate invernali e per i freddi viaggi al mattino verso lavoro. Fai attenzione - Chilly's funziona fin troppo bene!

ASCIUTTO

• Sotto Vuoto, a tenuta stagna

Il nostro coperchio avvitabile a tenuta stagna evita le borse bagnate e le fuoriuscite accidentali. L'isolamento a vuoto significa che la tua Chilly's Bottiglie rimarrà priva di condensa.

• Materiali di Qualità. Senza BPA

Le Chilly's Bottiglie sono costruite in acciaio inossidabile 304 resistente, di alta qualità, sia per le pareti interne che per le pareti esterne. Ciò conserva il sapore e la freschezza della tua bevanda, senza alcuna contaminazione.
